

OMEGATREK™

The Omegatrek Wireless Communications

System was designed to work with either an Iwatsu Enterprise-CS or your current telephone system. The accessibility that Omegatrek provides reduces the number of voice mails and missed calls. Moreover, an Omegatrek can be used seamlessly at any location in a Campus Network. Keep the handset with you to both make and receive calls and access communications features from your extension as if you were in your own office.

Application is the Key

Omegatrek delivers measurable benefits to a wide range of industries by allowing businesses and individuals to stay in close contact with customers and associates. The result is measurable gains in productivity by improving response times, cutting down on wasted time spent trying to locate people and missing fewer calls. Below are examples of how individuals in different industries benefit from Omegatrek.

HEALTHCARE

Hospital staff can respond to patient needs and be more aware of emergency situations if they are instantly accessible. In a medical environment, Omegatrek will save time when time is critical to saving lives.

MANUFACTURING AND WAREHOUSING

Management staff in manufacturing plants and warehouses are always in close contact with customer service and floor staff with Omegatrek. This results in quicker response to problems and customer demands.

RETAIL STORES

Cashiers can easily reach personnel on the retail floor to check the price of an item. Customer hold times are also reduced by eliminating time consuming pages to locate personnel.

OFFICES

For many people, a large portion of their day is spent away from their phone. Omegatrek ensures that they can always make or receive an important call from anywhere in the office.

Increase Accessibility and Productivity

The Omegatrek Portable Station was designed to operate just like your desktop telephone with one major improvement: You can take it with you. Many of the most useful feature including forwarding, message waiting indication, conferencing and voice mail are completely accessible from anywhere in your building.

Any Telephone System Benefits from Omegatrek

With the Iwatsu Enterprise-CS telephone system, the Omegatrek application is fully integrated. With other manufacturer's telephone systems, Omegatrek may be integrated via E&M tie lines, analog lines, or a T1 circuit. In either configuration, you and your employees will benefit from increased productivity, greater mobility, and advanced wireless features.

Omegatrek PS6 Portable Station

The Omegatrek PS6 is a lightweight portable wireless telephone that will change the way you do business. Designed to operate as a digital wireless key telephone, the Omegatrek PS6 Portable Station provides access to many Iwatsu Enterprise-CS system features from anywhere within the Omegatrek service area. Key feature benefits offered by the Omegatrek PS6 Portable Station include:

- A three-line display that shows caller ID information, portable station status, and a personal contact directory
- Access to the majority of Iwatsu Enterprise-CS system features via eight programmable multi-purpose keys with a red/green LED and nine feature keys
- A personal directory that can contain up to 500 contacts
- Multiple ringing tones including vibrate mode
- An integrated headset jack
